

TECHNICAL SPECIFICATION

Product: COCO GLUCOSIDE TSK-LIQ022

Date: 26/08/2021 Version: 3

Specification

Property	Units	Minimum	Maximum
Active content	%	50.0	53.0
pH (10% solution)	-	11.5	12.5
Viscosity at 25°C	mPas	2500	6000

Description

COCO GLUCOSIDE MB is a nonionic surfactant made from renewable raw materials; glucose derived from corn and fatty alcohols from RSPO certified Palm Kernel Oil.

Features & Benefits

Coco Glucoside MB is suitable for a wide range of personal care and industrial cleaners. It combines excellent foaming, emulsifying and hydrotroping properties.

Especially suited for high alkaline stability and high temperature resistance.

Typical Properties

Property	Units	Value
Visual appearance at 20°C	-	Pale, yellow liquid
Density at 20°C	g/cm ³	Ca 1.10

Handling & Storage

Coco Glucoside MB is a very stable product. Store at room temperature.

Endeavours have been made to ensure that the information given is reliable, but notwithstanding this, and except for those obligations and liabilities that cannot be excluded by operation of law, neither SFC & TSK Ltd nor any of its subsidiary or associated companies assume any obligation or liability arising from the information given, the recommendations made or the use of their respective products. Since the conditions of handling and use are beyond our control, we do not guarantee any results, and we are not liable for any damage incurred by following these suggestions. Product trials, full scale testing and end product performance are the responsibility of the user. The customer assumes all risk and liability for any testing, use or handling of any material beyond SFC & TSK direct control. You are referred to the standard terms and conditions of the supplying company which apply. Certain applications may have the benefit of patent registration and you are therefore recommended in your own interest to take appropriate steps to avoid the infringement of such.
